## **Supplement 2**

William J. Slattery, *Editor*

This supplement contains the permuted titles of more than 5,700 voluntary engineering standards, specifications, test methods, codes and recommended practices published by 164 U.S. technical societies, professional organizations and trade associations. Each title can be found under all the significant key words which it contains. These key words are arranged alphabetically down the center of each page together with their surrounding context. The date of publication or last revision, the standard number and an acronym designating the standards-issuing organization appear as part of each entry.

Key words: Engineering Standards, index of; Index of standards, recommended practices, specifications, test methods; Key-Word-In-Context index of voluntary standards; KWIC index of standards; Standards, voluntary, index of.

### **1. Introduction**

This supplement to NBS Special Publication 329 contains the permuted titles of more than 5,700 voluntary engineering standards, specifications, test methods, codes and recommended practices published by 164 U.S. technical societies, professional organizations, and trade associations. The titles listed fall into three categories: (1) those published between January 1, 1972 and July 1, 1974; (2) those erroneously omitted from SP 329 and Supplement No. 1, and (3) those published prior to 1972 but not on file with the Standards Information and Analysis Section at the time of publication of SP 329.

Standards Information Services, Engineering and Product Standards Division continues to serve as a technical library and referral activ-

ity. Inquirers may write or visit the Center, which is located in the Technology Building, Rooms B151-B159, NBS, Gaithersburg, Maryland, about 20 miles northwest of Washington, D.C.; or call on Area Code 301-921-2587. Comments or suggestions concerning this supplement of SP 329 are welcome, and should be sent to the editor, Standards Information Services, Technology Bldg., B163, National Bureau of Standards, Washington, D.C. 20234. To be placed on the announcement list of future supplements, please fill out the tear sheet at the end of this Index.

This supplement, which like supplement No. 1 is noncumulative, should be used with both the basic index (NBS SP 329) and supplement No. 1.
